

11CX • 11CX*i*

EXCAVATOR

CONFINED SITE

Comfortable even within 3 m sites.

LOADING

Loads at the back high capacity lorries.

OFFSET

Can be operated to the left or right to excavate alongside a wall or an obstacle.

GALLERY

Thanks to its compactness and kinematics it is ideal for tunnels and gallery sites.

LOADER

BACKFILLING AT 90°

Loads and backfills a trench while running parallel to it.

LOADING AT 90°

Its loading cycle is twice as fast as a conventional loader.

360° ROTATION

Ideal for any site within restricted and confined areas.

ABOVE TRENCHES

One application for the 4 X I bucket.

Mecalac 11CX

Without leaving the cab, the automatic and mechanical "quick hitch system" allows tools and attachments to be changed in seconds. "Click-Clack Mecalac" the right tool at the right time.

POWER COMPACTNESS PROFITAE

• 11CXi

Rops and Fops cab, comfortable, sound-proofed, with excellent visibility.

Articulated and oscillating chassis.

Chassis oscillation lock standard on 11CXi, optional on 11CX model.

Boom ram with parallelogram frame ensuring variable throw.

Optional hydraulic offset.

HANDLING

OVER HEAD

Handling off highway with 360° rotation from - 3,5 m to + 6 m.

IN CONFINED SITES

Thanks to its 360° rotation capacity it works in restricted space.

AT 90°

Placing and fitting of large pipes while travelling parallel to the trench.

10 m HIGH

Handling up to 10 m.

ATTACHMENT HOLDER

HYDRAULIC BREAKER

Power, flexibility of the equipment, accuracy of the work.

BUSH-CUTTER

Parallel to the embankment and facing the site.

AUGER

By the wheels or upto 6 m distance or above an obstacle.

RAIL ROAD VERSION LOADER

But also excavating, handling, or carrying attachments.
