Volvo Maszyny Budowlane Poland wins the 2026 Volvo CE Masters World Final

In front of a live audience at Volvo Construction Equipment's (Volvo CE) Customer Center in Eskilstuna, Sweden, Volvo Maszyny Budowlane Poland defeated the world's best aftersales teams to become Volvo CE Masters World Champion 2026, demonstrating the exceptional technical expertise and teamwork that underpin its customer support operations.

Held from 14-16 September 2026, the Volvo CE Masters World Final brought together 14 teams from Europe, Asia, China, North America, Latin America, India and the International region. Each team had earned its place through a rigorous qualification process that began with close to 3,000 participants worldwide, making this the largest edition of the competition in its 35-year history.

Competing against the top qualifying teams from every Volvo CE region, Volvo Maszyny Budowlane outperformed all challengers to secure the title of Volvo CE Masters Champions 2026. The 2026 competition also marked the introduction of a new individual championship alongside the traditional team competition. A live audience at the Customer Center watched each challenge unfold in real time, as participants demonstrated the very best talent from across Volvo CE's global dealer network.

V O L V O

Volvo Maszyny Budowlane's team, the *Golden Boys*, comprising Michał Pietrzak, Piotr Lebda, Michał Motycki, Remigiusz Piątek and Paweł Olkowski, arrived in Eskilstuna as European Regional Final champions, having secured victory earlier in the competition at Volvo CE's facility in Konz, Germany.

Their World Final triumph caps a journey that began with online qualification rounds and ended at the top of the global leaderboard. More than a symbolic accolade, the result is a proven demonstration of technical excellence, teamwork, and customer-focused expertise. It reflects the same capabilities customers rely on every day when Volvo CE technicians are called upon to keep machines operating at peak performance.

Volvo CE Masters tests the capabilities that matter most on a customer site: the speed and accuracy of machine diagnostics, deep product knowledge across Volvo CE's equipment range, and the ability to work efficiently and effectively as a team under pressure. These are not skills manufactured for a competition — they are the same capabilities that help customers minimize downtime and maximize productivity on-site.

"This is an incredibly proud moment for all of us. Becoming Volvo Masters World Champions is a remarkable achievement, but what makes it truly special is the team behind it. Their expertise, passion, commitment and trust in one another made this success possible. I am extremely proud of what they have achieved together and sincerely grateful to everyone who contributed along the way."

- Kamila Czaja, Head of Retail Operations, Volvo Maszyny Budowlane

"Volvo CE Masters exists to celebrate the people who keep the world's construction projects moving. What the Golden Boys from Poland have achieved here represents the highest standard in our global dealer network. Every customer they serve should know that."

— Anna Fröjdfeldt, Head of Aftermarket Learning Portfolio, Volvo CE

About Volvo CE Masters — The Battle of Skills

Volvo CE Masters is one of the largest technical skills competitions in the global construction equipment industry. Now in its 35th year, it challenges teams of aftersales professionals from authorized Volvo CE dealers worldwide to prove their expertise across practical machine challenges, product knowledge and teamwork. In 2026, close to 3,000 individuals entered the competition — the highest participation in its history. The competition features two parallel championships: an individual competition and a dealer championship. The 2026 World Final took place at the Volvo CE Customer Center in Eskilstuna, Sweden.
