WASTE HANDLING

VOLVO

Waste handling equipment tailored for your application

Volvo Compact Wheel Loaders are well known for their reliability and toughness on the job. But when you work around recycling material, broken glass and scrap metal all day, you need extra protection to withstand the abuse. That is why you should look into the Volvo waste handling package.

From the boom cylinders to the taillights and everywhere in between, the Volvo Waste Handling Package is designed specifically for the recycling industry so you can keep running, no matter what the conditions.

See your local Volvo Construction Equipment dealer today for details.

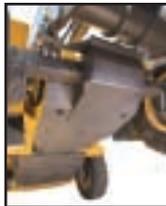

1 Perforated Air-Intake Protection Screens

Air intake screen will limit entry of fine debris into the engine compartment without sacrificing cooling capacity. It may be easily removed for fast daily cleaning.

2 Driveline Guard

The driveline, hydraulic motor and other components located underneath the machine are protected by a thick steel plate to prevent damage from debris and other materials. Special access to hydraulic and fuel tanks has been designed to facilitate maintenance.

3 Scrap Handling Bucket

Quick-attach buckets specifically designed for waste handling. Made with high-strength steel, the scrap bucket features independent dual hydraulic clamps to grip material such as paper, plastic or metal. The unique Volvo quick coupler provides outstanding visibility to the bucket. A standard automatic return-to-dig position facilitates loading/unloading operations.

4 Hydraulic Attachment Bracket

Allows you to utilize the wheel loader in different applications where special machines are otherwise required, e.g., forks, crane arm, broom, high-tip bucket. A steel protection case prevents scrap and other debris from damaging hydraulic fittings.

6 Grease Zerk Guards

Protective guards installed over exposed grease zerks.

5 Boom Lift Cylinder Protection

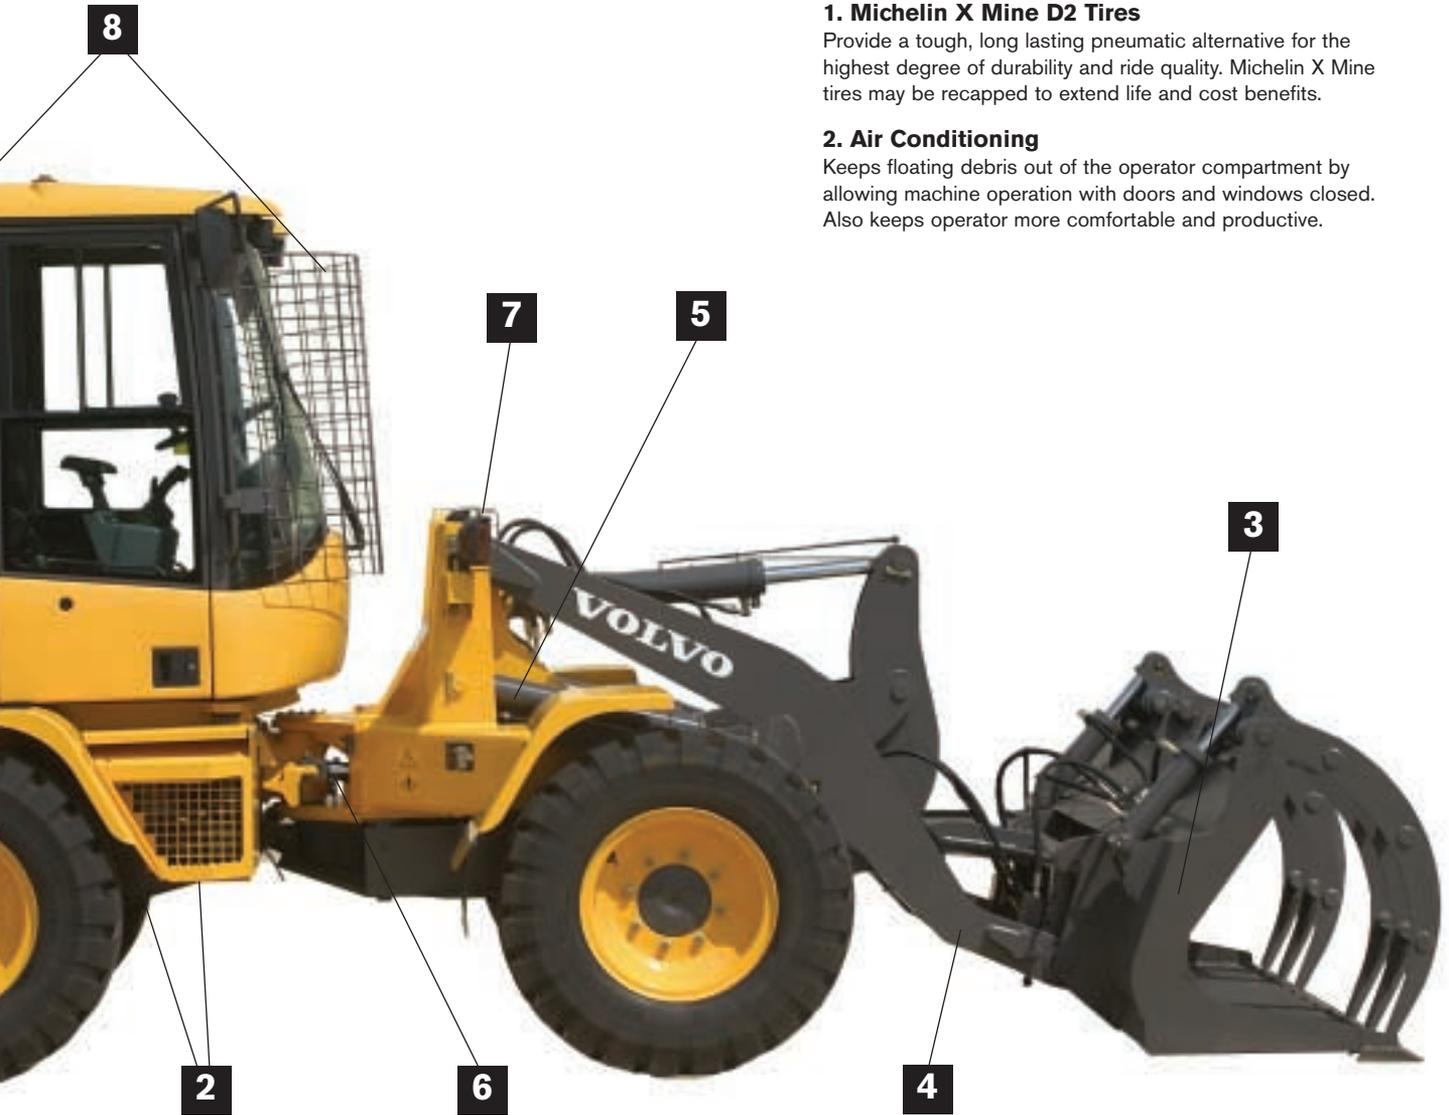

Designed to protect the boom cylinder hoses and tubes, these "box-type" structures prevent debris from damaging hoses and/or tubes when scrap becomes trapped between the front frame and the boom cylinders.

7 Headlight Guards

Protect work lights and turn signals from debris that may break or damage the lenses.

RECOMMENDED OPTIONS

1. Michelin X Mine D2 Tires

Provide a tough, long lasting pneumatic alternative for the highest degree of durability and ride quality. Michelin X Mine tires may be recapped to extend life and cost benefits.

2. Air Conditioning

Keeps floating debris out of the operator compartment by allowing machine operation with doors and windows closed. Also keeps operator more comfortable and productive.

8 Window Guards

Protect the windshield, rear window and operator from debris. Custom-designed to minimize glass breakage while maximizing visibility.

9 Sy Klone Filter

Engine cyclonic pre-filter helps prevent debris from entering the main engine air filter to ensure longer engine life in tough job applications.

10 Rear Hood Protection

Rear guard, in combination with the cast counterweight, helps prevent engine cover damage. The guard swings away to facilitate easy service access.

11 Taillight Guards

Protect the taillights and turn signal from debris that may break or damage the lenses.

Technology on Human Terms

Volvo Construction Equipment is one of the world's leading manufacturers of construction machines, with a product range encompassing wheel loaders, excavators, articulated haulers, motor graders and more.

The tasks they face vary considerably, but they all share one vital feature: technology which helps man to perform better: safely, efficiently, and with care of the environment. We refer to it as Technology on Human Terms.

The sheer width of the product range means it is always possible to choose exactly the right machine and attachment for the job. Each machine also comes with the quality, continuity, and security which is represented by the

Volvo name. The security of the service and parts organization; the security of always having immediate access to leading-edge research and technical development are part of the Volvo name. A machine from Volvo meets the very highest demands in all kinds of jobs, under all conditions, the world over.

Volvo Construction Equipment develops, manufactures, and markets construction equipment. We are a Volvo company with production facilities on four continents and a market presence in over 100 countries.

All products are not available in all markets. Under our policy of continuous improvement, we reserve the right to change specifications and designs without prior notice. The illustrations do not necessarily show the standard version of the machine.
