VOLVO BM 4300

Specification Volvo BM Loader 4300

PRODUCTIVE

A distinguising characteristic of the Volvo BM 4300 is the well-balanced compatability of all its units: engine; transmission; the excellent geometry of its loader unit, plus the new, wide attachment bracket enabling attachments to be changed quickly and easily. All these advantages add up to outstanding productivity.

RELIABLE

Thorough laboratory testing and practical trials in demanding applications throughout Sweden and Europe have proven the 4300's high reliability and capacity.

COMFORTABLE

The cab is the ultimate in design standards. It is sound suppressed and has a most efficient climatic control system. So operating the Volvo BM 4300 is both comfortable and safe. The driving seat, and the levers, controls and instrumentation, have been designed with great attention to detail. They have all been thoroughly tested under harsh working conditions, and all are located for ease of operating.

ENGINE

Volvo BM TD42

Output, flywheel

Max torque

Rore

Stroke

67 kW at 36.5 r/s DIN 70020 (91 hp at 2200 r/m) 79 kW at 36.5 r/s, SAE J 270 (107 hp at 2200 r/m) 324 Nm at 26.5 r/s, DIN 70020 (33 kpm at 1600 r/m)

366 Nm at 26.5 r/s, SAE J 270 (37.3 kpm at 1600 r/m)

105.5 mm (4.2 in) 120 mm (4.7 in)

Number of cylinders 4

Displacement 4.2 lit (256 cu in)

The TD42 engine with direct injection has replaceable wet cylinder liners, light metal pistons and a crankshaft carried in five bearings. The engine air cleaning system cleans the intake air in three stages:

- 1. Cyclone precleaner with automatic dust ejection through the exhaust
- 2. Large replaceable paper filter with cab mounted indicator
- 3. Replaceable safety element

ELECTRICAL SYSTEM

Voltage Alternator 45 A (1250 W) Battery 2×12 V, 96 Ah Starter motor 3 kW (4 hp)

The alternator ensures efficient battery charging, even at low engine speed. The powerful starter motor gives easy cold-weather starting. Travelling and the powerfull Halogen working lights, permit safe and efficient work in the dark. Fuse panel is well protected and easily accessable inside the cab.

TORQUE CONVERTER

Volvo BM single-stage, single-phase torque converter.

Torque multiplication ratio 3.3:1

TRANSMISSION

Volvo BM, countershaft type, full power shift transmission in four forward and four reverse speeds.

Maximum speeds forward and reverse with 17.5-25 tyres

1st 7 km/h 4.4 mph 2nd 11 km/h 6.8 mph 3rd 26 km/h 16.1 mph 4th 37 km/h 23 mph

AXLES

Volvo BM design

Free floating axle shafts carry torque, not machine weight, and incorporate planetary hub reductions. The front axle is equipped with differential lock as standard. The long wheelbase, the big wheels, and rear axle oscillation contribute to the 4300's outstanding stability and go-anywhere mobility.

BRAKES

Service

All wheels are equipped with air over hydraulic self-adjusting disc brakes. For maximum safety, the brake system is split into

two independent circuits - one for the front wheels and one for the rear wheels.

Parking, Mechanical on transmission shaft.

TYRES

Choice of

17.5-25/12 - L2, L3

STEERING

Centre-point frame articulation Steering angle

Turning radius (over tyres)

(a₂) 5 m (16'5")

Pump Gear-type design

68 lit (15 lmp gal)/at 10 MPa (1420 PSI) Pump output

and 2200 r/m

Relief pressure 10.5 MPa (1500 PSI)

The design of the steering system provides easy smooth steering without bumps and jolts being felt through the wheel. The system provides approved emergency steering.

HYDRAULIC SYSTEM

Pump

Gear-type design

Pump output

180 lit (39.6 lmp gal)/min at 10 MPa

(1420 PSI) and 2200 r/m

Relief pressure

14 MPa (2000 PSI)

Cylinders:

Control valve:

Three spool valve with built-in pressure

relief valve

Functions

2. Lift - float position with hold lock

3. Attachment or external hydraulics

The hydraulic system is equipped with a 3rd hydraulic control as standard and a 4th function can easily be added. The reliable lever system allows easy-touch operation. The hydraulic oil tank is extra-large for maximum cooling of the oil. The vented air in the tank passes through the engine-air cleaner.

SERVICE REFILL CAPACITIES

Cooling system 23 lit (5.1 Imp gal) Crankcase 12 lit (2.6 lmp gal)

Transmission and torque converter Front axle differential

24 lit (5.3 lmp gal)

Rear axle differential

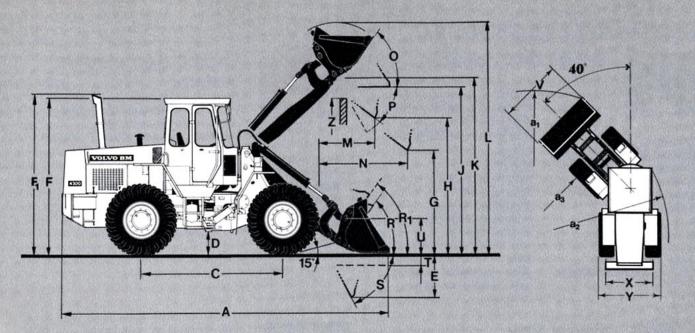

17.9 lit (3.9 lmp gal) and hubs 140 lit (30.8 lmp gal) Hydraulic system Hydraulic tank 105 lit (23 lmp gal) Fuel tank 195 lit (43 Imp gal)

CAB

The all-welded ROPS cab has two lockable doors and a roof hatch. The cab is approved in accordance with ROPS standards

(SEA J-394). The operator's station is ergonomically designed, with all controls and pedals located and designed for quick and easy operation. The operator's seat is fully adjustable. In its standard version, the cab is equipped with an efficient heating and ventilation system, with front and side window defrosters. The cab is mounted on the chassis via rubber pads, thereby minimizing the noise level inside the cab.

OPTIONAL EQUIPMENT

- Extra fuel filter (in addition to standard)
- Heavy-duty air cleaner
- Engine block heater: electric or propane
- Speedometer/odometer
- Alternative types or tyres
- 4th hydraulic function
- Double brake pedals
- Hydraulic outlet
- · Extra working lights
- Air conditioner
- Underbody protection plates
- Towing hitch
- Inspection lamp
- Heated seat
- Lifting eyes for shipping
- Attachment bracket with quickchange coupling mechanical or hydraulic locking
- Protective screen for lights, front and rear
- Safety belt
- Single acting lifting function
- Rotating beacon with or without collapsible mounting bracket
- Automatic lubrication system
- Tyre inflation kit
- Bucket positioner and boom kick out
- Windscren washers

"Quick-change" Coupling System

The Volvo BM 4300 may be delivered with quick-change coupling for hydraulic locking as optional equipment to fully utilize the wide range of attachments available.

The manufacturers reserve the right to change specification or design without prior notice. Illustrations do not necessarily show the machine in its standard
