

SD-100 PRO-PAC™ Vibratory Soil Compactor

The Ingersoll-Rand SD-100 PRO-PAC™ Series features an economical four cylinder Cummins turbocharged and aftercooled diesel engine. This 125 hp (93kW) liquid-cooled engine is fuel conservative, easy to service and provides long life. To satisfy demanding applications where superior gradeability is required, the SD-100D and SD-100F are standard with axle drive plus drum drive. The lightweight, single-piece engine enclosure is hinged to allow unobstructed access to the engine, radiator, battery, filters, and daily maintenance checkpoints.

The SD-100 PRO-PAC operator's station is designed for comfort and safety. A fully adjustable, suspension-mounted seat is standard. Four independent vibration dampeners isolate the operator's platform from machine vibration. Controls and gauges are ergonomically positioned.

A variable frequency control is provided to adjust vibration to the natural resonant frequency of the material being compacted, within a range of 1100 to 1850 VPM (18.3 to 30.8 Hz). Centrifugal force up to 52,500 lb. (233.5 kN) quickly densifies even the most difficult-to-compact materials. Dual amplitude is a standard feature for application versatility.

The SD-100 PRO-PAC is produced with two different drum configurations. The smooth drum model, SD-100D, works best for compaction of coarse-grained materials like granular soils or aggregates. The pad foot model, SD-100F, is the correct unit for compaction of fine-grained materials like silt, clay or mixed soils. Increased machine utilization and versatility for the SD-100D is available by installing the optional two-piece clamp-on pad foot drum shell kit.

Standard Features

- Adjustable scraper
- Back-up alarm
- Dual-beam, halogen front light
- Ground level access for maintenance/service
- No-Spin® differential planetary axle
- Oil bath eccentric lubrication
- Patented, dual amplitude eccentric mechanism
- ROPS/FOPS with seat belt
- Shock-mounted operator platform
- Variable vibration frequency

Selected Options

- Air precleaner
- Compactometer
- Conversion drums (D to F or F to D)
- EROPS cab with heat or A/C and heat
- Patented clamp-on padfoot drum shell kit
- Rear work lights
- Strike-off blade
- Traction valve for SD-100D
- Contact factory for additional options
