Volvo Excavators 34.8-36.9 t 286 hp

EC350D

Volvo Construction Equipment

EC350D

AMS

The Attachment Management System (AMS) - controlled through the I-ECU - stores settings for up to 20 different hydraulic attachments.

Robust undercarriage

The strong, three-piece undercarriage and high tensile steel X-shaped frame are built to withstand tough conditions.

Service access

Grouped filters and greasing points are easy to access from ground level via large, wide compartment doors.

Customer Support Agreements

Customer Support Agreements offer preventive maintenance, total repairs and a number of uptime services.

The best machine for the job

ECO mode

Volvo's unique ECO mode improves fuel efficiency without any loss of performance in most operating conditions.

Volvo D8 engine

The powerful, new Volvo D8 engine delivers the ultimate combination of high performance and low fuel consumption.

Work modes

Volvo's unique, integrated work mode system now includes the G4 mode for optimum fuel efficiency and machine performance.

Volvo cab

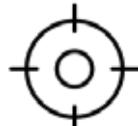

Spacious and safe operator environment with all-around visibility, an adjustable seat and easy to access controls.

Advanced hydraulics

New electro-hydraulic system and main control valve use intelligent technology to control on-demand flow for high performance and efficiency.

Boom float

Reduce cycle time and improve control in grading operations by using gravitational force to 'float' the boom over the ground.

I-ECU

The new, color LCD monitor clearly displays machine status information for easy operation and increased productivity.

Strong structure

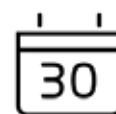

Strong and durable structure with a reinforced boom and arm allow the machine to work in the most severe, heavy-duty applications.

Climate control system*

Industry-leading air circulation and defrosting system with 14 well-spaced vents for increased operator comfort and productivity.

*Optional in certain markets

Extra water separator*

An additional water separator further prevents water and impurities from entering the engine – providing extended engine lifetime, extra durability and reliability.

*Optional in certain markets

Volvo EC350D in detail

Engine

The in-line six cylinder water cooled diesel engine, which provide excellent performance, is equipped with EMS 2.2 electronically controlled, high pressure fuel injectors, cooled external EGR*, turbo charger with waste gate, air-to-air intercooler. (*for certain regions)

Electrical System

Well protected high-capacity electrical system. Waterproof double-lock connectors are used to ensure corrosion-free connection. Main relays and fuses are located in a shielded electrical distribution box. The master switch is standard. Advanced monitoring of machine functions and important diagnostic information are displayed on the I-ECU.

Max. slew torque	kNm	126

Travel System

Each track is powered by an automatic two-speed shift travel motor. The track brakes are multi-disc, spring-applied and hydraulic released. The travel motor, brake and planetary gears are well protected within the track frame.

Max. drawbar pull	kN	261

Hydraulic system

The new electro-hydraulic system and new MCV (main control valve) use intelligent technology to control on-demand flow for high-productivity, high-digging capacity and excellent fuel consumption.

The following important functions are included in the system for optimum performance:

Summation system: Combines the flow of both hydraulic pumps to ensure quick cycle times and high productivity.

Boom priority: Gives priority to the boom operation for faster raising when loading or performing deep excavations.

Arm priority: Gives priority to the arm operation for faster cycle times in leveling and for increased bucket filling when digging.

Swing priority: Gives priority to swing functions for faster simultaneous operations.

Boom, arm and bucket regeneration system: Prevents cavitation and provides flow to other movements during simultaneous operations for maximum productivity.

Power boost: All digging and lifting forces are increased.

Holding valves: Boom and arm holding valves prevent the digging equipment from creeping.

Cab

Access to the operator cab is made easy thanks to a wide door opening. The cab is installed on hydraulic dampening mounts to reduce shocks and vibration levels. These, along with sound absorbing lining, provide low noise levels. The cab has excellent allround visibility. The front windshield easily slide up into the ceiling. The lower front glass can be removed and stored in the side door.

Integrated air-conditioning and heating system: The pressurized and filtered cab air is supplied by an automaticallycontrolled fan. The air is distributed throughout the cab from 14 vents.

Ergonomic operator's seat: The adjustable seat and joystick console move independently to accommodate the operator. The seat features multiple adjustments and a seat belt for the operator's comfort and safety. ROPS Cab is available as an option to comply with ISO 12117-2 standards.

Notes: 1. Machine in Fine Mode-F (Power Boost) for lifting capacities. 2. The above loads are in compliance with SAE J1097 and ISO 10567 Hydraulic Excavator Lifting Capacity Standards. 3. Rated loads do not exceed 87% of hydraulic lifting capacity or 75% of tipping load. 4. Rated loads marked with an asterisk (*) are limited by hydraulic capacity rather than tipping load.

LIFTING CAPACITY EC350D

Lifting capacity at the arm end without bucket.

For lifting capacity including bucket, simply subtract actual weight of the direct fit bucket or the bucket with quick coupler from the following values.

	Lifting hook related to ground level	1.5 m		3.0 m		4.5 m		6.0 m		7.5 m		9.0 m		Max. reach

Notes: 1. Machine in Fine Mode-F (Power Boost) for lifting capacities. 2. The above loads are in compliance with SAE J1097 and ISO 10567 Hydraulic Excavator Lifting Capacity Standards. 3. Rated loads do not exceed 87% of hydraulic lifting capacity or 75% of tipping load. 4. Rated loads marked with an asterisk (*) are limited by hydraulic capacity rather than tipping load.

Specifications

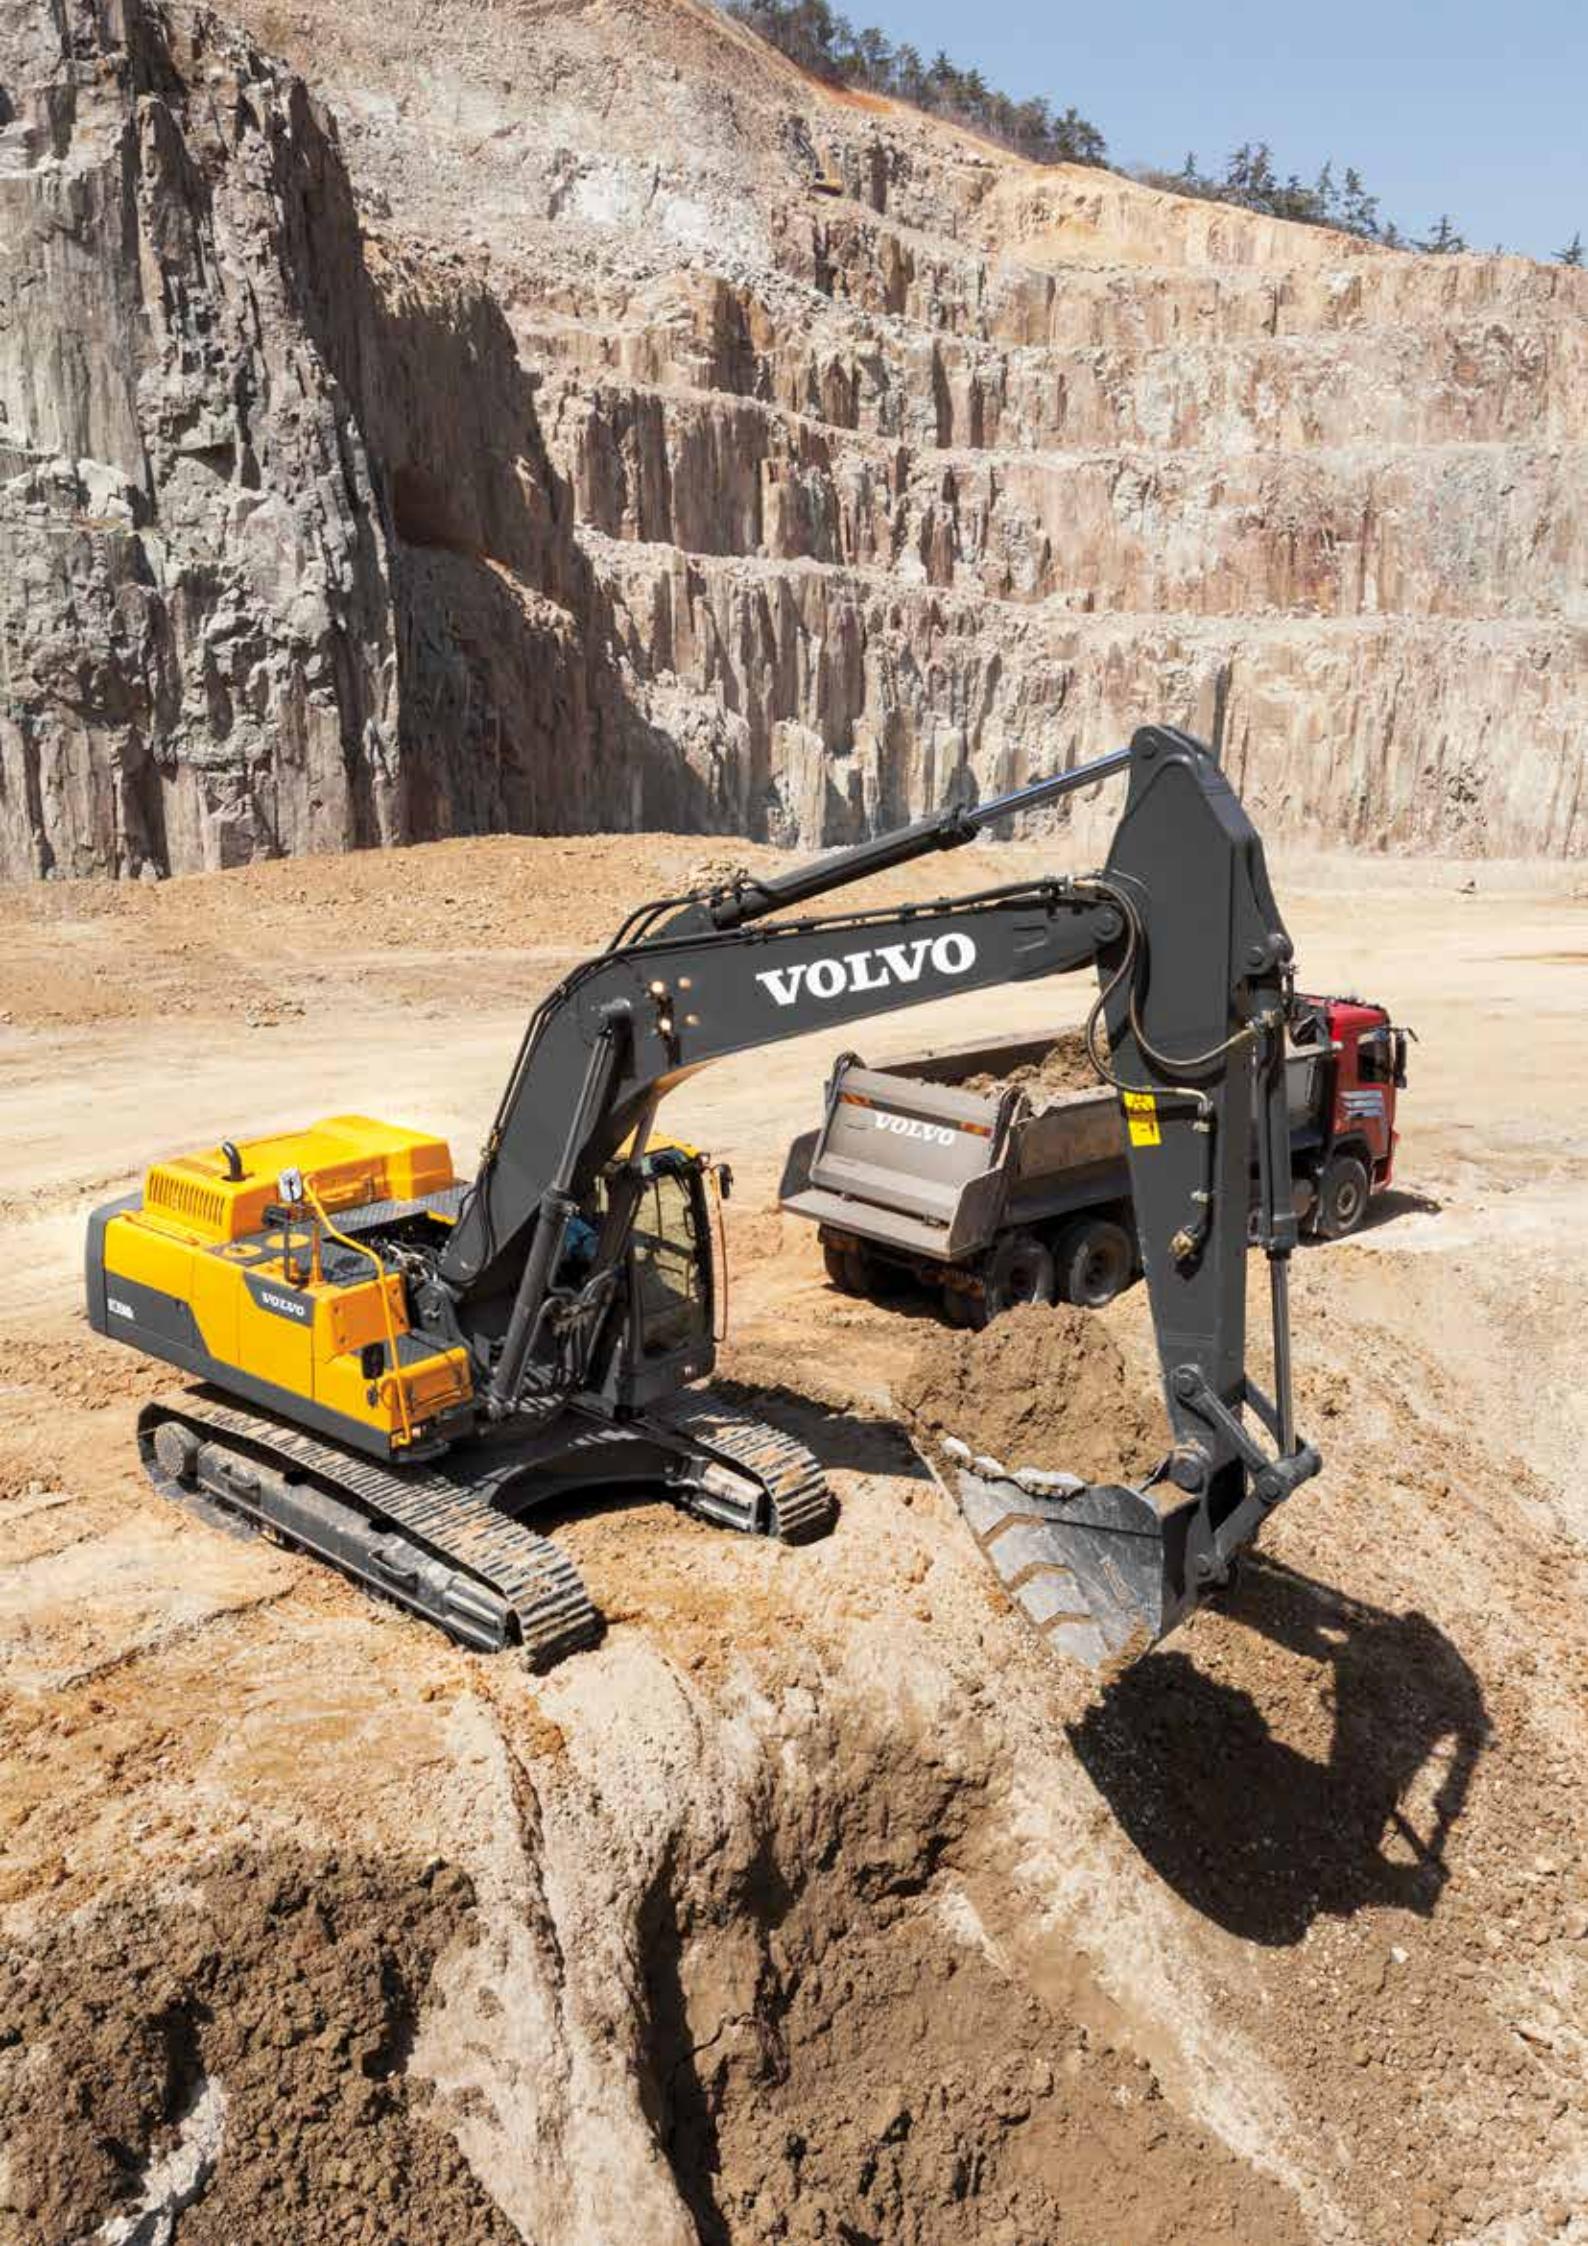

LIFTING CAPACITY EC350DL

Lifting capacity at the arm end without bucket.

For lifting capacity including bucket, simply subtract actual weight of the direct fit bucket or the bucket with quick coupler from the following values.
