WHY CHOOSE VOLVO CERTIFIED USED EQUIPMENT?

All Volvo Certified Used Equipment is inspected and classified into one of our three elite categories of used equipment — Volvo Certified, Volvo Inspected and Volvo Inspected Engine Ready.

To reach our **Volvo Certified** level of used equipment, machines are tested and

reconditioned using Genuine Volvo Parts and components. These top-tier machines include a 1-year/2,000-hour powertrain, hydraulics and major components warranty.

Volvo Inspected machines are inspected by trained technicians, and wear components,

tire condition, cab condition and leaks are all inspected and noted. Plus, they're backed with a 30-day, full-machine warranty.

Our unique third tier of used equipment, **Volvo Inspected Engine Ready**, includes engine-ready machines that are

de-tiered to work in less regulated markets outside of the United States and Europe. These machines also come with a 1-year/2,000-hour powertrain warranty.

Volvo Certified Used Equipment checks all the boxes.
