VOLVO HYDRAULIC CYLINDER PARTS

The high demanding nature of work causes Excavator hydraulic cylinders to fail or degenerate from their peak performance over a period of time. Cost effective solutions are needed to aid customers on regular maintenance, repair and replacement of these critical Hydraulic Components when failures do arise.

Volvo CE currently offers various solutions to the customers

- **Re Seal** : Cylinder Seals kits are available for re-sealing to address leaks or for regular maintenance of Hydraulic Cylinders.
- **Repair** : Cylinder Parts like Rods, Pistons and Tubes are available when Hydraulic Cylinders have to be repaired.
- **Replace** : New and Reman Complete Cylinder Assy can be purchased when the Hydraulic Cylinders are damaged beyond repair.

VOLVO EXCAVATOR CYLINDER SEAL KITS

Key features

- Everything you need for the job.
- No missing parts.
- All parts used in Seal Kits are Genuine Volvo Parts.
- Saves time and money – much easier and less expensive than ordering the individual parts.

ACTIVECARE

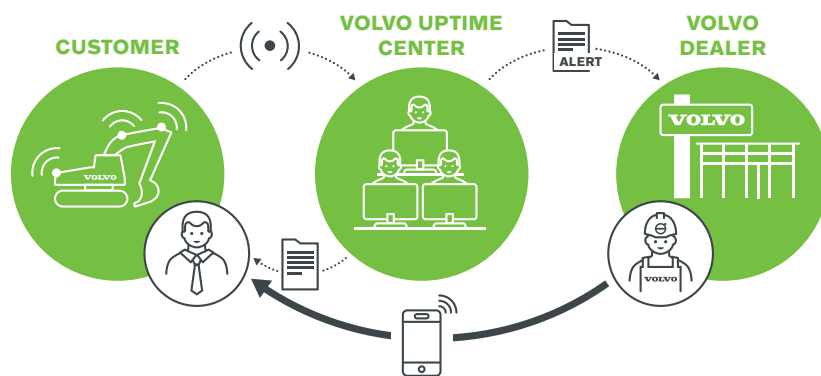

What is ActiveCare?

ActiveCare is an Uptime Service from Volvo Services – an innovative and customer friendly offering delivered by Volvo in collaboration with our dealerships.

It is effectively a service which combines ActiveCare Insights Reports with the live monitoring of Volvo machines and adds the support provided to all participating dealerships by Volvo Uptime Centers. The purpose of ActiveCare is to proactively deliver outstanding uptime to the customer, allowing them to get on with running their business.

ActiveCare works by monitoring machines and feeding the information back to Volvo Uptime Centers – positioned strategically around the world. This information is used to provide the customer with periodic ActiveCare Insights Reports, giving them a valuable insight into how their machines are being used and where things could be improved. Meanwhile, at the Volvo Uptime Center, a dedicated team of machine experts uses the most advanced Volvo remote diagnostic systems to analyze the machine data and stands ready to alert the dealership as soon as a potential downtime risk is highlighted.

This means that your Volvo Dealer will be able to schedule the correct remedial action before you are even aware of the problem – allowing you the customer, maximum uptime and helping you to improve customer satisfaction.

ACTIVE MACHINE MONITORING

Leave it to us

We designed it. We built it. Now let us take care of it. With Volvo ACTIVE CARE, Volvo monitors the health of your machines remotely, and immediately alerts you if a machine intervention is required. This proactive approach helps to prevent breakdowns, while leaving you more time to focus on your core operations.

PUT REPORTS INTO ACTION

Ready-made analysis

Designed to identify areas where uptime could be improved, a weekly report will provide insights into how your machines are being used. Take action and work closely with your Volvo dealer to ensure your machine stays in optimum condition.
