

# - the key to maximum uptime

## The real thing

Only Genuine Volvo Maintenance Parts will ensure the performance of your machines. Vital products such as lubricants, filters and coolants have been developed and tested to extend engine life, enhance machine service life and reduce working cycle times by as much as 4.5%\*\*.

## Don't risk unplanned downtime

It's important that your machines are up and running all the time, to meet your deadlines and be profitable. A Customer Support Agreement will help to ensure maximal uptime of your machine.

The Volvo Customer Support Agreement gives you rapid access to technical support and skilled Volvo Service Technicians, providing quality parts and planned services for a minimal amount of interruptions to your business.

Contact your nearest Volvo dealer for more information about service levels and conditions.

\*\* For selected machines and lubricants such as WB102, AT102 and GO102.

Lubricants, filters and coolants

# Premium Volvo maintenance

## Installed by experts

For your machines to constantly perform on an optimum level, Volvo supplies quality maintenance parts that are tailor-made and installed by qualified Volvo Service Technicians. This will enable your fleet to perform to a high standard in every operation – without compromising on quality or performance.

With our integrated telematics system CareTrack\* you can get notifications by e-mail or sms when your machine is due for maintenance. Your dealer will have the possibility to contact you and plan maintenance well in advance to ensure that the machine is operating when you need it the most.

## Delivered at the right time

Timing is essential when it comes to machine maintenance. When you rely on the premium Volvo maintenance, all parts will be delivered at the right time to enable your team to always keep your machines up to standard.

\* CareTrack is not available for all markets.

Genuine Volvo Maintenance Parts

# A perfect match

Genuine Volvo Coolants, Filters and Lubricants are designed to match your machines perfectly. They are vital keys for extending the service intervals, maintaining high performance levels and reducing your running costs.

Eventually, this will provide you with increased machine uptime, reduced cost of ownership and longer service life for your machines.

## Volvo Coolants

20% of engine failures can be attributed to cooling system failures. Approved, verified and tested for use in Volvo engines, genuine Volvo Coolants ensure the performance of your fleet by protecting key components.

Using other coolants for your Volvo machines increases the risk of corrosion damage and material incompatibility resulting in reduced performance, downtime and expensive repairs.

### Volvo Coolant

- Superior thermal transfer and optimal corrosion protection increases engine life.
- Maximum anti-freeze and boiling protection prevents freezing and overheating.
- Compatible with all Volvo-specific materials to protect the complete cooling system and prevent leakages.
- Leaves no deposits in the cooling system.

### Volvo Coolant VCS

- This OAT-based coolant (Organic Additive Technology) provides long-lasting engine protection and service intervals up to 6,000 hours<sup>1)</sup>.
- Improved heat transfer properties provide outstanding engine protection.
- Tests<sup>2)</sup> show that VCS outperforms other high-quality OAT coolants regarding corrosion and cavitation protection, and deposit formation.

1) With Genuine Volvo Coolant VCS.  
2) Contact your nearest Volvo dealer.

## Volvo Filters

If the engine is the heart of a Volvo, the filters are the liver and lungs. Fitting the wrong filters to a Volvo engine or machine is like giving it a critical illness. Volvo filters make sure it stays in peak condition.

Repairing damage caused by malfunctioning filters can cost up to 100 times more than the price for Genuine Volvo Filters, which are proven to ensure efficient filtration and extended machine life.

**Volvo Long-life Engine Oil Filters** have a larger filter medium area and higher dirt-absorbency capacity. Their longer service life means reduced maintenance costs.

**Volvo Fuel Filters** are designed for maximum efficient filtration area: 99.85%. Impressive dust capacity ensures maintained performance for their entire service life.

**Volvo Breather Filters** clean the air used to ventilate the oil system, thus significantly reducing contaminants entering the oil system and minimizing component wear.

**Volvo Cab Filters** meet all the stringent criteria that will keep the operator environment safe even in the most dangerous environments.

**Volvo Hydraulic Oil Filters** offer better cleaning, leading to less wear, increased service life and reduced risk of a breakdown – and maximizing operating time.

COST UP TO **100** TIMES MORE WITHOUT GENUINE VOLVO PARTS

## Volvo Lubricants

Only by using Volvo Lubricants is it guaranteed that your machine will function as initially intended, with the original performance capabilities, component protection and optimized service intervals.

Genuine Volvo Lubricants help extend machine service life and reduce your cost of ownership. They can double the service intervals, to up to 4,000 hours<sup>3)</sup>. For example, Volvo Lubricants offer:

**Volvo Engine Oils** offer minimal engine wear, longer service life and excellent corrosion protection.

**Volvo Hydraulic Oils** offer high corrosion protection and can handle high temperatures as well as severe cold.

**Volvo Automatic Transmission Fluids** maximize operating reliability, service life and performance.

**Volvo Wet Brake Oils** help minimize drag losses to boost fuel efficiency, driving speed and performance.

**Volvo Axle Oils** provide longer service intervals and improved efficiency in severe operating conditions.

**Volvo Transmission Oil 10W and Oil 30** are engineered to meet the strict demands of the L350F Wheel Loader transmission.

**Volvo Lithium Grease EP 2** lubricates and protects machine parts exposed to friction in very tough conditions.

**Volvo High Temperature Grease** is based on mineral oil and polyurea and has a wide service temperature range – up to 200 °C.

3) For selected machines and lubricants. Please contact your dealer.
